PROFESSIONAL SUMMARY

Full Stack Software Developer with 2+ years of experience building enterprise platforms and AI-powered applications using React, Node.js, and PostgreSQL. Delivered measurable results 70% increase in user engagement, 40% faster releases, & 30% reduction in unauthorized access. Skilled in REST API design, RBAC & GenAI development with LangChain & RAG.

WORK EXPERIENCE

Eazy ERP | Software Developer Mar 2024 - Present

- Owned end-to-end delivery of Eazy Cockpit across 6 enterprise modules in an agile, CI/CD-driven environment.
- Designed REST API contracts and relational data models in collaboration with backend teams.
- Engineered role-based access control (RBAC) across API middleware and UI guards, cutting unauthorized access by 30%.
- Delivered data-heavy React dashboards on paginated, indexed REST endpoints, driving a 70% increase in user engagement.
- Configured GitHub Actions CI/CD pipelines for automated build, test, and deploy, accelerating release velocity by 40%.
- Hardened production stability on ManageDMS by debugging and fixing full-stack issues across API, DB, and UI layers.
- Automated core business workflows using DronaHQ, eliminating manual operations effort across multiple teams.
- Established frontend coding standards and a reusable component library adopted across 3 product teams.

PROJECTS

MedDoc-AI — Full Stack GenAI Medical Document Assistant ([LINK](#)) 2026

- Architected an end-to-end RAG platform on LangChain and Google Gemini for medical PDF ingestion and Q&A.
- Built a multi-agent extraction pipeline: document processor, embeddings, metric & finding extractors, summary generator.
- Designed a Prisma/PostgreSQL schema with users, documents, health metrics, conversations, and audit logs.
- Developed the Node.js + Express 5 backend with Clerk auth, Multer + pdf-parse ingestion, Zod validation.

Mentai — AI Career Assistant Platform ([LINK](#)) 2025

- Built an AI-driven career platform generating industry insights, quizzes, tailored resumes, and cover letters.
- Implemented the GenAI pipeline using Next.js and ShadcnUI to deliver real-time personalized outputs.
- Integrated Clerk authentication for secure multi-user sessions and account management.
- Orchestrated background jobs with Inngest for reliable, serverless workflow execution.

Outfit Organizer — Production React + Redux Wardrobe Application ([LINK](#)) 2025

- Built a production-deployed React + Redux wardrobe app with occasion-based outfit recommendations.
- Designed a full CRUD system with per-image editing, confirm modals, and reusable component patterns.
- Implemented search, multi-criteria filters, and sort functionality across 6 interconnected pages.
- Modeled global state with Redux to support consistent UX across complex wardrobe interactions.

EDUCATION

Prestige Institute of Engineering Management and Research (RGPV Affiliated) Aug 2019 - Jun 2023

B.Tech., Computer Science (CGPA: 9.10)

Indore, MP

TECHNICAL SKILLS

GenAI / AI Engineering: LangChain, Google Gemini, Retrieval-Augmented Generation (RAG), Prompt Design, Multi-Agent Extraction pipelines, Pinecone, Agentic AI

Backend: Node.js, Express 5, REST APIs, WebSockets, Multer, Helmet, Zod, Rate Limiting, Clerk/JWT auth, Pdf-parse

Frontend: React 19, Next.js, TypeScript, JavaScript (ES6+), Redux, TailwindCSS, ShadcnUI, Radix UI, Recharts, Vite, HTML5, CSS3

Databases: PostgreSQL, Prisma ORM (schema design, migrations, indexes), MySQL, MongoDB

DevOps/Tools & Others: GitHub Actions CI/CD, Vercel, Firebase, Git, Postman, Syncfusion, DronaHQ, C++, C
